Executive Summary

The SBT Alliance Limited Group ('SBT' or 'the Group') is an insurance Group; the principal and only insurance entity in the Group being Beacon Insurance Company Limited ('BICL' or 'the Company'), an insurer licensed in Gibraltar.

The purpose of this report is to satisfy the public disclosure requirements under the Financial Services (Insurance Companies) (Solvency II Directive) Act ("the Solvency II Act in Gibraltar") including the Delegated Regulations of the European Parliament. The elements of the disclosure relate to business performance, governance, risk profile, solvency and capital management.

2018 has been a year of little actual change for Beacon Insurance Company Limited although much change is planned. The Board put the Company up for sale early in 2018 and several potential purchasers were sourced. The Board agreed on the favoured offer and a change of control application was submitted to the Gibraltar Financial Services Commission ('GFSC'). This purchase did not go ahead due to the financial conditions applied to the sale and the length of time the application took. The Company withdrew from this potential sale in August 2018 and an alternative potential purchaser was sourced. The second change of control application was submitted to the GFSC in November 2018 and is still in progress at the end of 2018. Until this is completed the Company will not look to develop any new business in order that an acquiring business is free to develop the Company according to its requirements. If a sale cannot be achieved the Board will look at other options for the future of the Company.

The Company renewed its participation in a global catastrophe treaty. Which had been very successful in previous years. The Company renewed its participation for the 2018 year on the back of hardening of rates. The Company wrote no other business during the year.

Throughout 2018 the Company continued to run off its Swiss branch activities.

In 2018 the Board held no investments and only cash. The Board considered that, with the volatility and uncertainty in the markets, investment in cash was a sound policy.

Despite the disappointing performance in 2018 the Company ended the year with net assets in excess of circa €6.3m. The Directors believe that the capital base will be adequate to support the business in 2019.

The risk profile of the Company has not changed significantly during the year.

The Company and Group have continuously complied with all aspects of the Solvency II regulations from the date of first implementation on 1 January 2016. The Company reports a ratio of free reserves to solvency capital requirement of 109.08% (110.35% for the Group) as at 31 December 2018.

Malcolm Ruffell
Chief Executive Officer
Beacon Insurance Company Limited

Date: 3rd June 2019

A. Business & Performance

1. Business

1.1. This report relates to SBT Alliance Limited ('SBT') and its subsidiary company, Beacon Insurance Company Limited ('BICL' or 'the Company'), an insurance company licensed in Gibraltar and limited by shares; collectively 'the Group'.

1.2. SBT is a non-regulated holding company domiciled in Gibraltar. Group supervision is carried out by BICL's regulator:

Gibraltar Financial Services Commission ('FSC')
PO Box 940
Suite 3, Atlantic Suites
Gibraltar
Tel: +350 200 40283
www.fsc.gi

BICL has a Swiss branch and this is regulated by:

Swiss Financial Market Supervisory Authority ('FINMA')
Laupenstrasse 27
3003 Bern
Switzerland

1.3. SBT and BICL's external auditor is:

PricewaterhouseCoopers Limited
327 Main St
GX11 1AA
Gibraltar
www.pwc.gi

The Swiss branch's external auditor is:

PricewaterhouseCoopers Limited
Birchstrasse 160
CH-8050 Zürich
Switzerland
www.pwc.ch

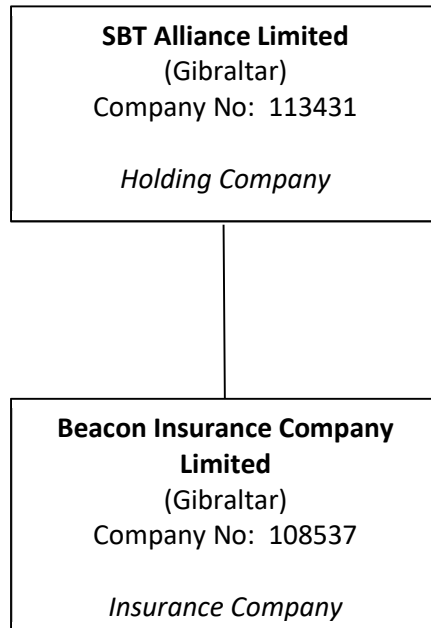

The audited financial statements of the Company and the Group are prepared in accordance with Gibraltar Accounting Standards ("Gibraltar Generally Accepted Accounting Practice") specially Gibraltar Financial Reporting Standard 102 "The Financial Reporting Standard" ("GAAP 102") and Gibraltar Financial Reporting Standard 103, "Insurance Contracts" ("GAAP 103").

1.4. SBT shareholders with qualifying holdings:

Marco Sturlese

BICL is 100% owned by SBT.

1.5. The SBT Group is shown below:

1.6. BICL is authorised to carry out insurance business in the following jurisdictions:

1.6.1. United Kingdom – land vehicles and motor vehicle liability;

1.6.2. Reinsurance only – accident; railway rolling stock; aircraft; ships; goods in transit; fire and natural forces; damage to property; aircraft liability; liability for ships and general liability.

BICL is no longer authorised to underwrite new insurance business in Switzerland but carries out claims handling on a motor book which is being run off by BICL's Swiss branch.

1.7. The only material undertaking in the Group is BICL, the results of which derive from insurance activities and investment activities. BICL recorded losses of €408,055 (2017: €1,362,539) in the year ended 31 December 2018 and had net assets of €6,318,449 (2017: €6,726,504). The losses for the year were affected by the write off of seed funding for the legal expenses business which BICL decided not to write, and general expenses of running the Company. The global catastrophe treaty made modest profit which was a good result given the adverse wildfires experience during the year.

1.8. The only other entity in the Group is SBT, which acts as an insurance holding company.

1.9. There were no other significant events during the reporting period that materially affected the Company or Group.

2. Underwriting Performance

- 2.1. SBT's underwriting performance follows BICL's as the only insurance entity in the Group.
- 2.2. The premium written in the year ended 31 December 2018 of €1,236,485 (2017: €1,425,425) relates to the Company's participation in a reinsurance treaty.
- 2.3. Underwriting performance reported in the management accounts for the year ended 31 December 2018 being a loss of €628,790 (2017: €647,688).

3. Investment Performance

- 3.1. SBT's main investment is its investment in BICL. The remainder of its investments comprise predominately of secured loans in private entities. The income on these loans for the year ended 31 December 2018 was €Nil (2017: €46,000).
- 3.2. There have been no changes to the Company's investments; it continues to be invested in cash and cash equivalents only.

4. Performance of Other Activities

- 4.1. There have been no other significant activities undertaken by the Group or the Company other than its insurance and related activities.

5. Any Other Information

- 5.1. There are no other material matters in respect to the business or performance of the Group or the Company.

B. System of Governance

1. General Information on System of Governance

SBT System of Governance

SBT is a non-trading holding company and so its governance is provided by its Board of Directors, which comprises of two Directors.

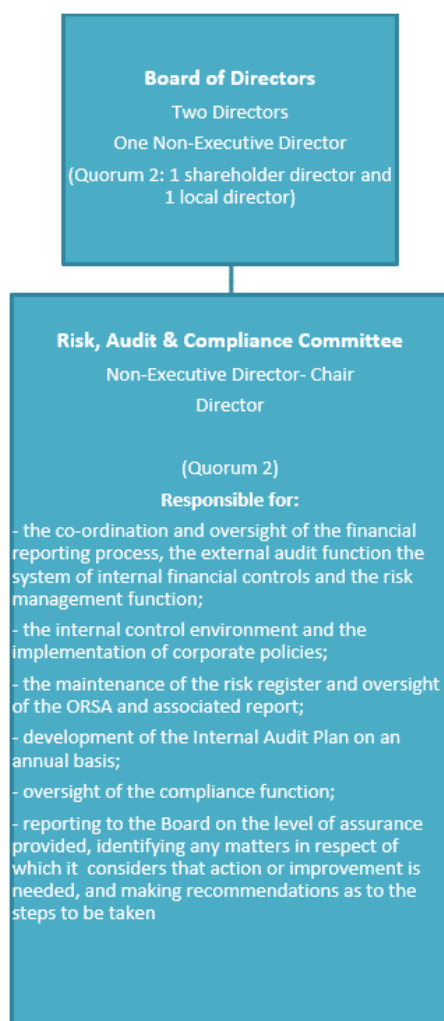

SBT has no Committees.

The SBT Directors received no remuneration for their services during the year.

There have been no dividends paid to the shareholders during the reporting period.

BICL System of Governance

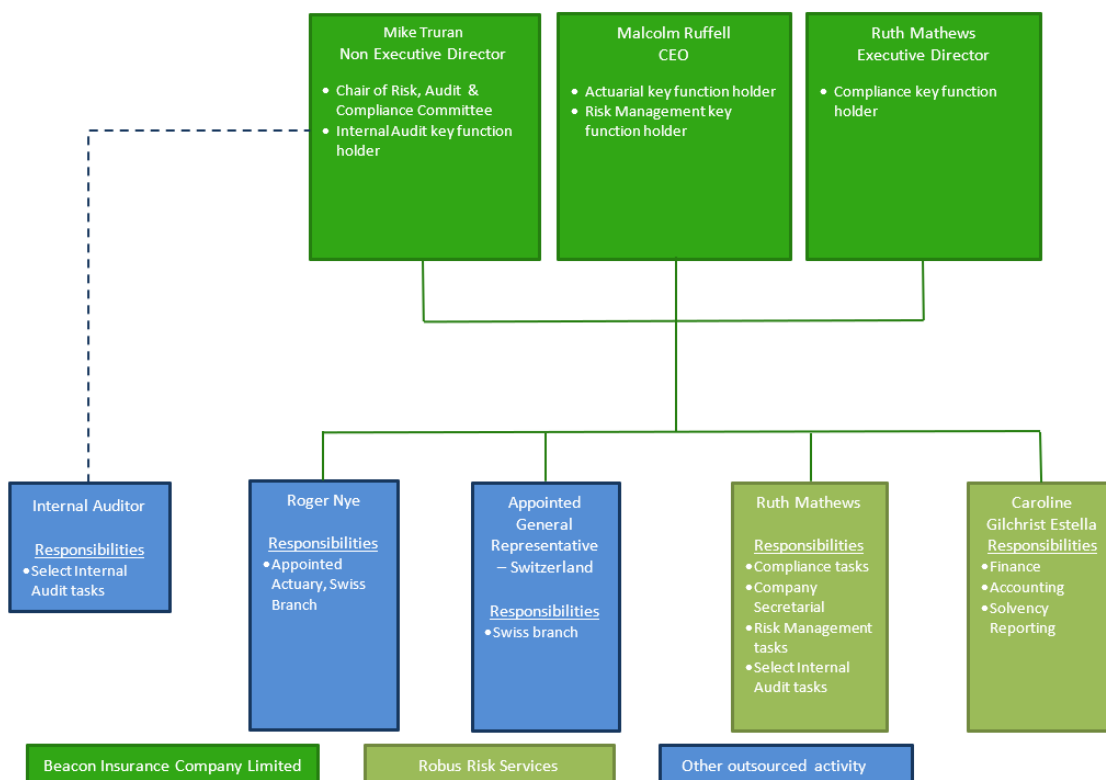

Board and Committee Structure

Terms of Reference describe the purpose, responsibilities, membership and authority delegated from the Board for each Committee. Relevant attendees are invited to Committees as determined by the Committee.

Two Directors resigned during 2018 and the Board now comprises of two Executive Directors (one of which is the CEO), and one NED.

Roles and Responsibilities

BICL has one employee who is both the Chief Executive Officer and an Executive Director. Remuneration of the Chief Executive Officer is set by the shareholder.

Directors’ and CEO remuneration will be approved by the Board, or if it is inappropriate to discuss at Board level, it will be discussed with and approved by shareholders. A Director shall abstain from discussion and decisions regarding his/her own remuneration to avoid conflicts of interest.

Directors were paid €145k (2017: €176k) during the reporting period. The Executive Director provided by the insurance manager was remunerated through the insurance management contract that the Company has with RRS.

There have been no dividends paid to the parent company during the reporting period.

There were no material intra-group transactions during the reporting period.

2. Fit and Proper Requirements

The Group recognises the value of the fit and proper requirements in that a company run in a fit and proper manner, by fit and proper Directors and other individuals holding key functions or roles, will benefit from the knowledge and experience brought to the Company and is more likely to be successful. In addition, the risks associated with a badly run business (largely regulatory, financial or reputational risks) will be diminished.

There is no definition for ‘fit and proper’; however, the term includes amongst other considerations the concepts of honesty, solvency and competence.

The basic elements of the fit and proper assessment are:

- honesty, integrity and reputation (e.g. treating customers fairly, proper respect of legal, regulatory and professional obligations, prudent approach to business);
- competence, ability to conduct business and organisation (e.g. adherence to ‘four-eyes’ principle, having a robust corporate governance structure, declaration of conflicts of interest, Directors having appropriate skills, knowledge and experience); and
- financial position (e.g. ensuring the Company has sufficient financial resources to meet commitments on a continuous basis, and is robust enough to withstand business risks)

The Group Boards ensure that any candidates for a position on a Board, or for other key functions or roles, shall be assessed to ensure that they fulfil fit and proper requirements. This includes reviewing the CV of the candidate, an in-depth interview, obtaining references (both personal and professional), and carrying out due diligence checks. Due diligence checks include verification of identification and address, and searches on due diligence databases. The candidate is also asked to declare any interests, so the relevant Board can review whether they conflict with the Company’s interests. All conflicts of interest identified are recorded on a log and reviewed at each Board meeting.

3. Risk Management System including Own Risk Solvency Assessment

SBT Risk Management System

SBT is a non-trading holding company and so its risk management is provided by its Board of Directors.

BICL completes the Group solvency calculation and monitors Group solvency on behalf of SBT and will liaise with the Group Board as necessary to ensure that the Group SCR is met and that risks to Group solvency are monitored and managed.

BICL is responsible for completing an Own Risk Solvency Assessment (‘ORSA’) for the Group, incorporating SBT and a solo ORSA on BICL. One supervisory report on both ORSAs is collated.

BICL Risk Management System

Risk Management Roles and Responsibilities

The risks in the Group are concentrated in BICL as the only trading company.

BICL recognises the importance of managing risks faced in the pursuit of its business objectives. It has therefore implemented a risk management framework to provide a logical and systematic approach to risk identification and management.

The BICL Board delegates its risk management function to the risk management key function holder and to the Risk and Audit Committee (‘RAC’) who oversee all risk related activity and ensure the Board

is kept informed or is consulted as required. BICL outsources some of its risk management tasks to its insurance manager, RRS; the risk management key function holder is responsible for coordinating outsourcing and challenging results.

The Board sets its risk appetites and tolerances; the actual risk in the business, compared to risk appetite and tolerance, is monitored by the RAC and escalated to the Board if required.

The Risk Management Process

The process of risk management is a continuous and systematic one, comprising five elements:

- a) **Identification;**
- b) **Assessment;**
- c) **Response;**
- d) **Monitoring;**
- e) **Reporting.**

The process revolves around the Risk Register on which identified risks, assessed risk scores, the response, including any controls in place, are all recorded. The Risk Register forms the basis of monitoring, being reviewed at each RAC meeting. Risk Management activity is reported and discussed at each RAC and the RAC provides a summary to the Board, escalating risks where necessary.

In addition, SBT and BICL carry out an Own Risk and Solvency Assessment ('ORSA') on an annual basis (more often if there are significant changes to the risk profile or business plan), which informs the Companies' business and capital planning processes.

Own Risk Solvency Assessment ('ORSA') Policy

The ORSA's main purpose is to ensure that the Group and BICL assess all the risks inherent to their businesses and determine the corresponding capital needs, or identify other means needed to mitigate these risks.

It particularly considers situations in which the Group or Company may be stressed, and the capital needs and mitigation measures necessary in these scenarios, to ensure that the business is prepared for, and robust enough to weather, adverse conditions without detriment to stakeholders. The ORSA takes a top-down approach, linking business objectives, business risks, business planning and capital planning. The results of the ORSA also feed back into the risk management process, ensuring that all risks identified are incorporated into the assessment, management, monitoring and reporting cycle.

The Boards carry out an ORSA at least annually on the basis that solvency needs and the capital position are not volatile, and the businesses' risk profile is stable. However, it will also carry out an ORSA if there is any material change to the risk profile or business plan, or set criteria are triggered.

A supervisory and internal report is prepared each time an ORSA is performed, and at least annually, covering both SBT and BICL.

ORSA Process

- 1) The Board carries out the initial Assessment, encompassing:
 - a. Review of business objectives and plan;
 - b. Identification of risks to meeting business objectives and plan;
 - c. Review of risk profile against risk appetite and tolerances;
 - d. Consideration of appropriate scenario/stress tests to be applied to each risk area and whether the tests applied by the SII standard model agree with the Company's risk profile;

- e. Where these differ, agree more appropriate scenario/stress tests to be applied;
 - f. Identification of areas where risk may be mitigated by diversification or accentuated by risk aggregation.
- 2) The business planning process begins, and the first draft business plan circulated.
 - 3) The ORSA is completed using the parameters set during step 1).
 - 4) The results are considered by the Board, along with the results of the standard model. In drawing its conclusions, the Board considers whether it has sufficient capital to mitigate its risks, whether additional capital needs to be sourced, or whether the business plan should be amended. It will also analyse whether it does and will comply on a continuous basis with its SCR and receive an opinion from the actuarial function on whether it will comply continuously with the requirements regarding the calculation of technical provisions, and identifying any risks arising from uncertainties related to this calculation.
 - 5) If the latter, the cycle returns to step 2.
 - 6) If the former, the Board either approves the ORSA and business plan, or waits until the availability of capital is confirmed at which point the plan will be approved or the cycle returns to step 2.
 - 7) When the business plan is approved, a report will be compiled containing the results and conclusions of the ORSA, which the Board will then approve for internal distribution to relevant staff and submission to the Regulator.

4. Internal Control System

SBT Internal Control System

SBT is a non-trading holding company; its finance function is provided by its company manager, RRS. The Directors ensure sound reporting and accounting procedures are in place to enable it to adequately monitor its business. SBT is subject to statutory audit which independently reviews its internal control system.

BICL Internal Control System

The Company's internal controls are part of its compliance framework, being the first line of defence in the 'three lines of defence' model the Company has implemented.

The company has implemented policies which describe the Board's approach to key areas of the business, and procedures, where appropriate, which describe how the Board fulfils its policies. These are reviewed at least annually to ensure they remain fit for purpose.

The Board is ultimately responsible for overseeing and maintaining the adequacy and effectiveness of the internal control system, however day-to-day oversight is provided by the compliance key function holder. In practice, the Risk and Audit Committee ('RAC'), other Directors, and key role holders also necessarily participate in the management of the system.

There is a risk-based Compliance Monitoring Programme ('CMP') in place to check that BICL fulfils all its legislative and regulatory requirements. This is completed by the compliance function on a quarterly basis and forms part of the Compliance Report to the RAC.

The compliance key function holder is responsible for identifying and evaluating compliance risk, and for the completion of compliance tasks, although these may be delegated. The compliance function has direct access to both the Board and the RAC.

The Board supports the compliance function and shall make available such resource as is necessary and provide access to all relevant documentation and information from the business to enable the compliance function to fulfil its aims.

5. Internal Audit Function

SBT Internal Audit Function

SBT is a non-trading holding company. Its only function is as an insurance holding company to BICL and this is subject to external audit. Given the activities and profile, there is no internal audit activity planned.

BICL Internal Audit Function

Internal Audit exists to provide the Company with independent assessments of the quality of internal controls and administrative processes and provide recommendations and suggestions for continuous improvement. It provides advisory services to management, will conduct investigations on an ad hoc basis as requested by management, and has responsibility for assisting in the development and operation of the risk management framework. It will also audit providers of material services to ensure that the agreements governing these relationships are being adhered to.

The Board appointed Internal Audit Key Function Holder has responsibility for the internal audit function and reports into the RAC. Internal audit tasks are outsourced to a third-party provider selected by the RAC; the key function holder also has responsibility for co-ordinating this outsourcing and challenging the results.

Internal audit activity is based on a risk based internal audit plan which is developed annually. It is approved and monitored by the RAC. The plan is subject to change throughout the year depending on the business and changing risk environment.

Audit reports are produced after each internal audit and provided to the RAC for review with management responses. Any actions coming out of the audits are monitored to completion by the RAC.

Internal audits will be conducted by appropriately skilled, experienced and independent persons to carry out the audit to the RAC's standards.

To carry out its work effectively and to retain integrity of the function, Internal Audit acts independently of line management. The internal audit function holder is responsible to the RAC for the planning, management and performance of internal audits; the RAC is chaired by a Non-Executive Director.

6. Actuarial Function

BICL is the only insurance entity in the Group and therefore the only one for which it is relevant to have an actuarial function; however, BICL's actuarial function supports Group activity where required, for example the Group solvency calculation and ORSA.

BICL's actuarial function is the responsibility of the key function holder, who reports directly to the Board. The tasks of the actuarial function are outsourced to RRS. The key function holder is also responsible for overseeing this outsourced relationship including monitoring the scope of work, service levels and challenging the results.

The actuarial function is responsible for:

- a) Coordination of the calculation of technical provisions;
- b) Ensuring the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions;
- c) Assessing the sufficiency and quality of the data used in the calculation of technical provisions;
- d) Comparing best estimates against experience;
- e) Informing the Board of the reliability and adequacy of the calculation of technical provisions;
- f) Expressing an opinion on the overall underwriting policy;
- g) Expressing an opinion on the adequacy of reinsurance arrangements; and
- h) Contributing to the effective implementation of the risk-management system.

Each of these activities is undertaken on an at least annual basis and the outcome reported to the Board in an internal actuarial report.

7. Outsourcing

Outsourcing is the use of a third party (either an affiliated entity within the same group or an external entity) to perform activities on a continuing basis that would normally be undertaken by the Company. The third party to whom an activity is outsourced is a 'service provider'.

Each Board shall ensure that an outsourcing arrangement shall not diminish the Company's ability to fulfil its obligations to customers or its regulator, nor impede effective supervision by its regulator (should it be regulated).

Fundamental responsibilities such as the setting of strategies and policies, the oversight of the operation of the Company's processes, and the final responsibility for customers, shall not be outsourced.

The respective Boards consider outsourcing where they believe that there is an advantage to the Company and customer by using a service provider e.g. access to specialist resource, provision of services in the same jurisdiction as the customer, cost benefits.

SBT Outsourcing

SBT is a non-trading holding company whose management is outsourced to RRS, primarily consisting of the provision of the accounting and company secretarial functions.

BICL Outsourcing

BICL is reliant on material service providers to fulfil its operational functions; due to the risk this presents, BICL has an outsourcing policy which describes how it takes the decision to outsource, how a service provider is selected, and how the relationship is defined, managed and monitored. The Company takes a risk-based approach to all of these activities.

Material Service Providers in the Reporting Period:

Service Provider	Service Provided	Jurisdiction Located
Robus Risk Services (Gibraltar) Limited	Insurance management (compliance tasks, risk management tasks, accounting, banking and investments, regulatory reporting, actuarial tasks, company secretarial)	Gibraltar
PRS Prime Re Services AG	Swiss branch appointed general representative	Switzerland
CH Consulting Services	Swiss branch appointed actuary	Switzerland
JPS Accounting Limited	Payroll services	Gibraltar

8. Adequacy of the System of Governance

The Group aims to continuously improve its compliance and governance systems by ensuring that they are reviewed, evaluated, and recommendations are made to the Board(s) regarding enhancing and developing the systems, including the outcomes from compliance monitoring programmes, root cause analysis from complaints, breaches and risk events, and incremental development as the systems mature. It also considers relevant industry advice and guidelines, for example the UK Financial Reporting Council's Corporate Governance Code, implementing these as appropriate for the size and complexity of the Group companies.

Internal audits and external audits provide independent evaluation of the Group's and BICL's system of governance. Recommendations from these audits are considered by the relevant Boards and implemented proportionate to the businesses' risks.

C. Risk Profile

1. Underwriting Risk

BICL is the only company in the SBT Group which is exposed to underwriting risk; the Group's underwriting risk is therefore the same as BICLs.

BICL

Underwriting risk is a key risk to BICL.

In 2018 it wrote one catastrophe reinsurance treaty. The underwriting risk associated with this treaty is mitigated by collateral held as ring-fenced funds. The Company has put development of the business on hold due to the potential sale of the Company.

The Company also has an historical motor book which was written through its Swiss branch in 2014. The book is in run-off and all policies have expired. The number of policies, and the reserve risk that BICL is exposed to, is very low.

Underwriting risk is monitored by the Board at least quarterly. It is assessed and monitored using performance information provided by the cedant such as premium, losses, reserves, IBNR, and loss ratio. The internal actuarial function reviews reserve risk and provides a report to the Board annually.

There has been no change to the methodology for identifying, assessing, managing and reporting on underwriting risk over the reporting period.

There has been no material change to the risks that the Company is exposed to in the reporting period.

2. Market Risk

SBT

SBT has no exposure to market risk as it is non-trading and therefore holds minimal funds in cash only.

BICL

BICL only holds cash and cash equivalents and therefore has no significant exposure to market risk.

Currency

BICL is exposed to four currencies, EURO, CHF, GBP and USD. The main exposure is the requirement to hold c. USD3m in cash equivalents as collateral for the global catastrophe treaty. The other most significant exposures are having expenses in GBP but no GBP income, necessitating exchange transactions, and run-off costs in relation to the Swiss branch in CHF with no CHF income.

RRS, the Company's insurance manager, monitors the exchange rates on a monthly basis or more regularly where there are significant movements in the relevant currency pair, assesses the currency risk on behalf of BICL, and will make recommendations via consultation with representatives of the Board regarding when to make foreign exchange transactions to mitigate the risk. The Board evaluates the efficacy of the mitigating measures in place and considers the additional use of foreign exchange hedging techniques.

The currency risk has fluctuated considerably over the reporting period due to the economic conditions in the USA, EU, UK and Switzerland.

Property

BICL is not exposed to property risk.

Interest rate

The Company is exposed to interest rate risk due to the tail on the books written. This is mitigated by the regulatory capital BICL holds.

Concentration

Concentration of counterparties in respect of cash exposures is considered with credit risk in Section 3.

Spread

The Company is not exposed to spread risk since it only holds cash and cash equivalents.

Investment market risk is identified, assessed and monitored through the Risk Register on which key market risks are recorded. See Section B3 for further detail.

3. Credit Risk

Credit risk is the risk that a counterparty will be unable to pay amounts in full when due.

SBT

SBT is exposed to very low levels of credit risk through amounts held with banks. This is mitigated by using financial counterparties with a credit rating of at least 'A'.

BICL

Credit risk is monitored by the Board to ensure that it remains within the Company's risk appetite.

Key areas where the Company is exposed to credit risk are:

- Amounts held with banks and other financial institutions; and
- Amounts due from policyholders.

Financial Institutions

All financial counterparties used have a credit rating of at least 'A', with the exception of operational bank accounts with The Royal Bank of Scotland, which is rated 'BBB'. The Company partners with a limited number of counterparties, reducing exposure and mitigating contagion risk.

Amounts due from intermediaries

Credit risk is presented by underwriting profit falling due from the primary insurer in respect of the reinsurance contract. This is mitigated however as the counterparty holds an AA rating.

4. Prudent Person Principle

The Group and the Company are required to invest the assets used to cover the minimum capital requirement and the solvency capital requirement in accordance with the 'prudent person principle'. The prudent person principle defines that the assets must be invested in a manner that a 'prudent person' would – that is that the decisions are generally accepted as being sound for the average person.

All of the Group and Company's funds are liquid; should any investment be made in the future they will be made in accordance with the prudent person principle.

5. Liquidity Risk

Liquidity risk is the risk that cash may not be available to pay the obligations when they are due. SBT and BICL hold only liquid assets and therefore are not exposed to any liquidity risk.

There is no expected profit included in future premiums.

6. Operational Risk

SBT

SBT is exposed to a low level of operational risk, being a non-trading holding company which outsources its operational functions to a company manager, RRS. This risk is mitigated by RRS having a comprehensive Business Continuity Plan in place. It is also exposed to a low level of crime risk, which is mitigated through the operational procedures RRS has in place around the finance function (e.g. two authorisers on payments) and which are reviewed as part of SBT's external audit.

There have been no material changes to operational risk in the reporting period.

BICL

BICL's key operational risks are:

- Outsourcing risk: the risk that a provider of key services is unable to operate, effecting BICL's ability to service customers. The most significant service provider is RRS, which provides company secretarial, compliance and accounting services. This risk is mitigated by having contracts in place which govern BICL's relationships with service providers and include service levels which must be met, and an Outsourcing Policy which details the Company's approach to managing service providers;
- Strategic risk: this is the principal risk to the Company due to the limited underwriting, and lack of availability of additional capital and new business. This has been mitigated by seeking a new owner to provide capital and direction going forward. A change of control application is currently being considered by the GFSC.

Operational risk within BICL is identified, assessed and monitored through the Risk Management Framework which is overseen by the Risk and Audit Committee, and by the Risk Management Key Function Holder.

There have been no material changes to the operational risks the Company is exposed to over the reporting period.

7. Other Material Risks

'Brexit'

The business plan forecasts only writing the HannoverRe Treaty, which will be unaffected by Brexit. It is likely that any new business considered when the change of control application has been approved will be UK based.

The other potential implication for BICL is the inability of its insurance manager's staff to access Gibraltar from Spain if there are border issues post-Brexit. The Company is liaising with RRS regarding their contingency plan for this.

The situation continues to be monitored by the Risk & Audit Committee and Board.

D. Valuation for Solvency Purposes

1. Assets

1.1 As at 31 December 2018, the Group held the following assets:

Asset Class	GAAP Accounts Value (€)	Look Through Adj. (€)	Reclassification for Solvency purposes (€)	Solvency Valuation Adj. (€)	Solvency Value (€)	Explanation of differences
Fixed assets	337	-	-	(337)	-	See [1.3.1]
Intangible assets and goodwill	1,797,696	-	-	(1,797,696)	-	See [1.3.1]
Bonds	-	-	-	-	-	No differences
Loans	-	-	-	-	-	No differences
Intermediary receivables	2,409,874	-	(2,409,874)	-	-	See [1.3.3]
Cash and equivalents	4,130,500	-	-	-	4,130,500	No differences
Prepayments	12,870	-	-	(12,870)	-	See [1.3.4]
Accrued income	-	-	-	-	-	No differences
Reinsurer share of technical provisions	-	-	5,107,535	(65,210)	5,042,325	See [1.3.3]
Other assets	2,937,726	-	(2,697,661)	-	2,937,726	No differences
TOTAL	11,263,916	-	-	(1,876,113)	9,387,803	

Reclassifications for solvency purposes are reclassifications to the technical provisions, whereas solvency valuation adjustments are valuation differences applied on a line-by-line basis.

As at 31 December 2017, the Group held the following assets:

Asset Class	GAAP Accounts Value (€)	Look Through Adj. (€)	Reclassification for Solvency purposes (€)	Solvency Valuation Adj. (€)	Solvency Value (€)	Explanation of differences
Fixed assets	1,738	-	-	(1,738)	-	See [1.3.1]
Intangible assets and goodwill	1,797,696	-	-	(1,797,696)	-	See [1.3.1]
Bonds	-	-	-	-	-	No differences
Loans	1,373,390	-	-	-	1,373,390	No differences
Intermediary receivables	2,311,244	-	(2,311,244)	-	-	See [1.3.3]
Cash and equivalents	7,435,575	-	-	-	7,435,575	No differences
Prepayments	17,219	-	-	(17,219)	-	See [1.3.4]
Accrued income	-	-	-	-	-	No differences
Other assets	128,395	-	-	-	128,395	No differences
TOTAL	13,065,257	-	(2,311,244)	(1,816,653)	8,937,360	

Reclassifications for solvency purposes are reclassifications to the technical provisions, whereas solvency valuation adjustments are valuation differences applied on a line-by-line basis.

1.2. As at 31 December 2018, the Company held the following assets:

Asset Class	GAAP Accounts Value (€)	Look Through Adj. (€)	Reclassification for Solvency purposes (€)	Solvency Valuation Adj. (€)	Solvency Value (€)	Explanation of differences
Fixed assets	337	-	-	(337)	-	See [1.3.1]
Bonds	-	-	-	-	-	No difference
Intermediary receivables	5,107,536	-	(5,107,536)	-	-	See [1.3.3]
Cash and equivalents	4,130,500	-	-	-	4,130,500	No differences
Prepayments	12,870	-	-	(12,870)	-	See [1.3.4]
Accrued income	-	-	-	-	-	No differences
Reinsurer share of technical provisions	-	-	5,107,536	(65,210)	5,042,326	See [1.3.3]
Other assets	140,975	-	-	-	140,975	No differences
TOTAL	9,392,218	-	-	(78,417)	9,313,801	

Reclassifications for solvency purposes are reclassifications to the technical provisions, whereas solvency valuation adjustments are valuation differences applied on a line-by-line basis.

As at 31 December 2017, the Company held the following assets:

Asset Class	GAAP Accounts Value (€)	Look Through Adj. (€)	Reclassification for Solvency purposes (€)	Solvency Valuation Adj. (€)	Solvency Value (€)	Explanation of differences
Fixed assets	1,738	-	-	(1,738)	-	See [1.3.1]
Bonds	-	-	-	-	-	No difference
Intermediary receivables	2,311,244	-	(2,311,244)	-	-	See [1.3.3]
Cash and equivalents	7,435,518	-	-	-	7,435,518	No differences
Prepayments	17,219	-	-	(17,219)	-	See [1.3.4]
Accrued income	-	-	-	-	-	No differences
Other assets	10,841	-	-	-	10,841	No differences
TOTAL	9,776,560	-	(2,311,244)	(18,957)	7,446,359	

Reclassifications for solvency purposes are reclassifications to the technical provisions, whereas solvency valuation adjustments are valuation differences applied on a line-by-line basis.

1.3. The valuation principles applied to these assets are consistent with those used in the GAAP accounts, with the following differences:

- 1.3.1 Fixed assets, intangible assets and goodwill – these have not been recognised for solvency purposes;
- 1.3.2 Bonds – these have been reflected to include accrued interest in the valuation;
- 1.3.3 Intermediary receivables – these have been reclassified to net off technical provisions;
- 1.3.4 Prepayments – these have not been recognised for solvency purposes.

2. Technical Provisions

2.1 The GAAP accounts of both the Group and the Company include provisions for claims incurred based on earned premiums which consider all reasonably foreseeable best estimates. This includes reserves for claims incurred plus a provision for claims Incurred But Not Reported ('IBNR'). The Group and the Company also consider any amounts recoverable from reinsurance contracts in respect of its claims reserves and IBNR. All data in section [2] below relate to both the Group and the Company unless stated.

2.2 The technical provisions by line of business as at 31 December 2018 are as follows:

Line of business	Technical provisions (excluding risk margin) (€)	Risk margin (€)	Technical provisions (€)
Other motor insurance	1,650,282	80,862	1,731,144
Marine, aviation and transport	1,091,229	45,235	1,136,464
Fire and other property damage	1,404,099	155,897	1,559,996
Total	4,145,610	281,994	4,427,604

As at 31 December 2017 these were:

Line of business	Technical provisions (excluding risk margin) (€)	Risk margin (€)	Technical provisions (€)
Other motor insurance	1,877,182	119,332	1,996,514
Marine, aviation and transport	468,225	46,266	514,491
Fire and other property damage	(599,357)	161,350	-438,007
Total	1,746,050	326,948	2,072,998

2.3 The key areas of uncertainty around technical provisions are as follows:

- 2.3.1 Estimation of outstanding loss reserves ("OSLR") and IBNR – Where the Company acts as reinsurer, the Company is reliant on the data and reporting of the primary

insurer for estimating OSLR and IBNR. In respect of losses of the Swiss branch, there are no open claims as at 31 December 2018.

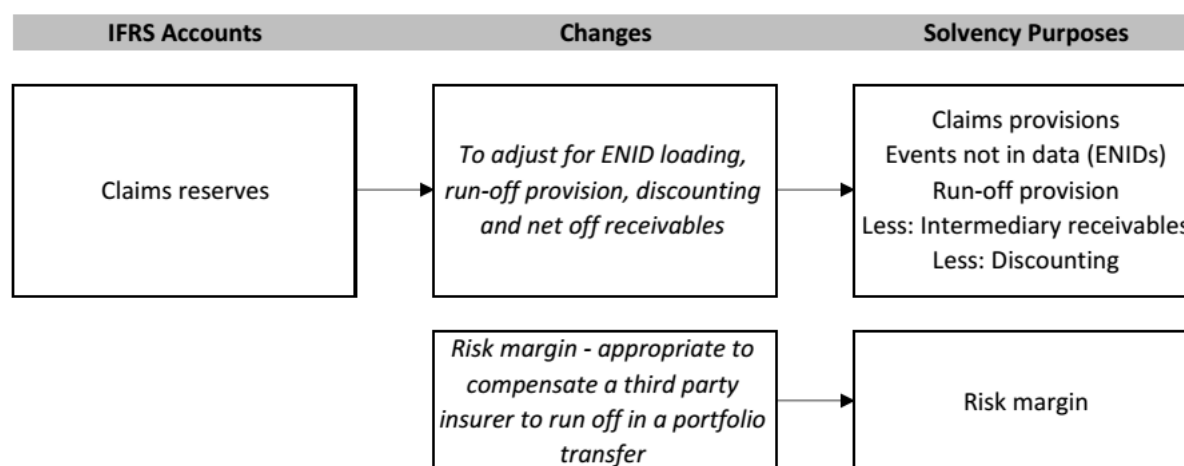

- 2.3.2 Events Not In Data ('ENID loading') – estimating a provision for events not in data is subject to considerable uncertainty as the events being reserved have not been observed.
- 2.3.3 Run-off expenses – the estimation of the change in expense base for run-off of the Company is inherently uncertain due to the estimations around the period of the run-off, base costs and inflation. The GAAP accounts include a provision for the run-off of the Swiss Branch as the branch is no longer authorised to carry out new business, and this provision has also been reflected in the run-off expenses.
- 2.3.4 Risk margin – the risk margin, being the margin payable to transfer the business to another insurance carrier, is uncertain due to the requirement to forecast future solvency capital requirements over the period of a run-off. This therefore shares the same uncertainties of the run-off expenses provision considered at [2.3.3], as well as the inherent uncertainties around forecasting future solvency capital requirements.

2.4 The Company manages the risks around these uncertainties via the following actions:

- 2.4.1 Ongoing monitoring of claims information received from the primary insurer;
- 2.4.2 Internal controls through the Underwriting Committee and Actuarial Function which monitor claims development.

The Company's mitigating actions will change as the lines of business change in line with the business plan.

2.5 The changes required to transition from GAAP accounts to technical provisions for solvency purposes are consistent, and are noted below:

We shall consider each of these adjustments to transition from GAAP accounts to solvency technical provisions.

- 2.5.1 Claims provisions – The Company and the Group have made no adjustments to their claims provisions in their GAAP accounts in recording the claims provisions for solvency purposes. The claims provisions as at 31 December 2018 is €2,559,806 (2017: €2,203,518).
- 2.5.2 Intermediary and reinsurance receivables – Intermediary and reinsurance receivables, including reinsurance deposits, are netted off the technical provisions

for solvency purposes. There are no valuation differences between the GAAP accounts and intermediary receivables for solvency purposes. The intermediary and reinsurance receivables as at 31 December 2018 is €5,107,536 (2017: €2,311,244)

- 2.5.3 Events not in data loading – Technical provisions for solvency purposes are required to allow for all possible events, including those that may not have been historically realised before. Such events not presented in a set of observable historical loss data are often called Events Not In Data ('ENID'). This is a difference in valuation methodology compared to the GAAP accounts which consider best estimates which can be reasonably foreseen, and therefore leads to a loading on the technical provisions to consider the probability weighted effect of events which have not previously been observed.

The Company and Group have considered if there have been any previously unobserved events for each line of business and sought to consider the probability weighted effect of such events and, given the business model. The Company and Group have concluded that such unobserved events are improbable. As such, the ENID loading applied by the Company and the Group as at 31 December 2018 was €nil (2017: €nil).

- 2.5.4 Run-off provision – Technical provisions for solvency purposes are required to take account of all expenses which will be incurred in servicing insurance obligations. This is commonly referred to as a 'run-off' provision as it considers all future expenses which would be incurred to allow the existing obligations to run-off.

The Company and the Group have considered a run-off period of nine years and estimated the level of future expenses based on the current level of expenses, considering the decrease in activity in the period, underlying expense inflation and an estimated minimum level of costs which would be incurred in any one year. The run-off provision applied by the Company and the Group as at 31 December 2018 was €1,753,125 (2017: €2,019,414).

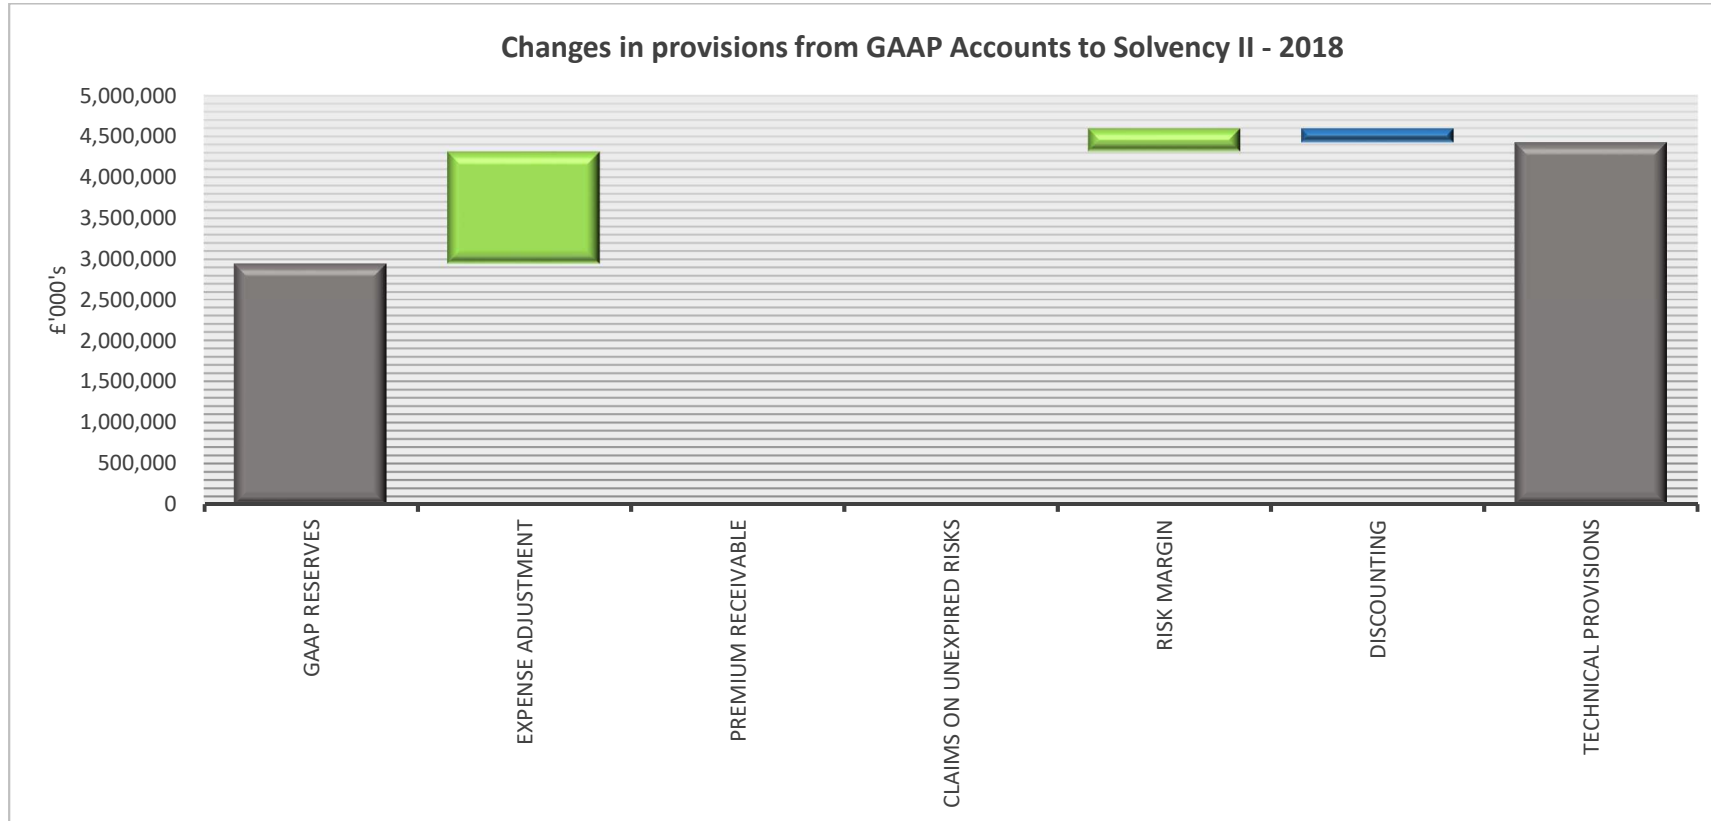

- 2.5.5 Discounting – Discounting has been applied in the technical provisions based on the USD yield curve as at 31 December 2018 as issued by the European Insurance and Occupational Pensions Authority ('EIOPA'). The USD yield curve was selected since the majority of the Company's and the Group's technical provisions are based in US Dollar. The impact of discounting on the technical provisions is €102,365 (2017: €165,898).

- 2.5.6 Risk margin – The risk margin has been considered to ensure that the value of the technical provisions is equivalent to the amount that would be expected to have to be paid to a third-party insurance company in order to take over and meet the insurance obligations of the Company. The risk margin has been calculated based on the estimated capital requirements to run-off the Company's obligations and applying a cost of capital of 6% (2017: 6%).

The capital required to run-off the portfolio is based on the future estimated SCRs, taking account of underwriting risk and reinsurance counterparty risk. This results in a risk margin of €281,993 (2017: £326,949).

Neither the Group nor the Company have applied the matching adjustment, volatility adjustment, transitional risk-free interest term structure or the transitional deduction in calculating its technical provisions.

2.6 The changes to technical provisions highlighted above are reflected in the waterfall diagram below:

Changes in provisions from GAAP Accounts to Solvency II - 2017

3. Other Liabilities

3.1 As at 31 December 2018, the Group recorded the following classes of liabilities for solvency purposes:

Liability	GAAP Accounts Value (€)	Solvency Value (€)	Explanation of Differences
Accruals	368,079	368,079	None
Other loans	1,188,000	1,188,000	None
Other creditors, including corporation tax and IPT	-	-	None

There have been no valuation adjustments for solvency purposes.

As at 31 December 2017 these were:

Liability	GAAP Accounts Value (€)	Solvency Value (€)	Explanation of Differences
Accruals	427,229	427,229	None
Other loans	1,188,000	1,188,000	None
Other creditors, including corporation tax and IPT	-	-	None

There have been no valuation adjustments for solvency purposes.

3.2 As at 31 December 2018, the Company recorded the following classes of liabilities for solvency purposes:

Liability	GAAP Accounts Value (€)	Solvency Value (€)	Explanation of Differences
Accruals	127,137	127,137	None
Other creditors, including corporation tax and IPT	-	-	None

As at 31 December 2017 these were:

Liability	GAAP Accounts Value (€)	Solvency Value (€)	Explanation of Differences
Accruals	190,288	190,288	None
Other creditors, including corporation tax and IPT	-	-	None

There have been no valuation adjustments for solvency purposes.

4. Alternative Methods for Valuation

Not applicable to the Group or the Company.

5. Any Other Information

Not applicable to the Group or the Company.

E. Capital Management

1. Own Funds

- 1.1. The Group and the Company undertake an Own Risk and Solvency Assessment ('ORSA') exercise at least annually, or when the risk profile of the Group or the Company changes. The ORSA exercise incorporates the business planning process which is typically considered over a three-year time horizon. There have been no significant changes in the reporting period.
- 1.2. The Company and Group classifies its own funds as tier 1, tier 2 or tier 3 depending on the characteristics of the capital. Tier 1 capital is the best form of capital for the purposes of absorbing losses.

The Group's own funds are as follows:

Own fund item	Tier	2018 €	2017 €
Share capital and related share premium	1	50,122	50,122
Redeemable preference shares and related share premium	1	12,044,880	12,044,880
Reconciliation reserve	1	(7,273,939)	(6,845,870)
		4,821,063	5,249,132

The Company's own funds are as follows:

Own fund item	Tier	2018 €	2017 €
Share capital and related share premium	1	10,000,000	10,000,000
Reconciliation reserve	1	(5,243,229)	(4,816,927)
		4,756,771	5,183,073

The reconciliation reserve represents retained earnings and reconciliation adjustments from IFRS balance sheet to SII balance sheet.

- 1.3. Only the Company's and Group's tier 1 own funds may be used towards meeting the Minimum Capital Requirement ('MCR').

2. Solvency Capital Requirements and Minimum Capital Requirements

- 2.1. The SCR of the Group as at 31 December 2018 was €4,368,855 (2017: €4,761,548). The SCR of the Company as at 31 December 2018 was €4,360,937 (2017: €4,761,546). The MCR of the Company as at 31 December 2018 was €3,700,000 (2017: €3,700,000).

2.2. The SCR of the Company and Group is made up as follows:

2.2.1. The Company and the Group are exposed to market risks derived predominately from the assets held by the Company and the Group to meet its insurance liabilities, although exposures to shocks in interest rates and currency rates also considered in the exposure from underwriting risks.

2.2.2. As at 31 December 2018 these were:

MARKET RISK	Company €	Group €
Interest rate risk	75,371	75,371
Spread risk	-	-
Equity risk	-	-
Currency risk	1,029,547	1,029,547
Property risk	-	-
Concentration risk	-	-
Market risk diversification	(50,320)	(50,320)
MARKET RISK TOTAL	1,054,598	1,054,598

As at 31 December 2017 these were:

MARKET RISK	Company €	Group €
Interest rate risk	147,387	147,387
Spread risk	-	-
Equity risk	-	-
Currency risk	832,113	832,113
Property risk	-	-
Concentration risk	-	-
Market risk diversification	(41,320)	(41,320)
MARKET RISK TOTAL	938,180	938,180

2.2.3. The Company and Group are exposed to counterparty risks in the form of cash deposits and recoveries from reinsurers (type 1) and from receivables from intermediaries, policyholders and other debtors (type 2).

As at 31 December 2018 these were:

COUNTERPARTY RISK	Company €	Group €
Type 1 risk	460,079	460,079
Type 2 risk	361,481	361,481
Market risk diversification	(31,202)	(31,202)
COUNTERPARTY RISK TOTAL	790,359	790,359

As at 31 December 2017 these were:

COUNTERPARTY RISK	Company €	Group €
Type 1 risk	490,122	490,124
Type 2 risk	346,687	346,687
Market risk diversification	(29,581)	(29,581)
COUNTERPARTY RISK TOTAL	807,228	807,230

- 2.2.4. The Company and Group are exposed to non-life underwriting risk as a result of the insurance policies they sell. The risks are based on volatility around earned premiums and claims reserves, and to catastrophe events to which the Company and Group may be exposed.

As at 31 December 2018 these were:

NON-LIFE UNDERWRITING RISK	Company £	Group £
Premium and reserve risk	1,288,536	1,288,536
Catastrophe risk	2,960,886	2,960,886
Non-life diversification	(555,784)	(555,784)
NON-LIFE UNDERWRITING RISK TOTAL	3,693,638	3,693,638

As at 31 December 2017 these were:

NON-LIFE UNDERWRITING RISK	Company £	Group £
Premium and reserve risk	1,297,727	1,297,727
Catastrophe risk	2,960,886	2,960,886
Non-life diversification	(531,073)	(531,073)
NON-LIFE UNDERWRITING RISK TOTAL	3,727,540	3,727,540

- 2.2.5. The final solvency capital requirement of the Company and the Group is the aggregation of the market, counterparty and non-life underwriting risks, less a credit for diversification, and then an additional charge to represent the operational risks faced by the Company and the Group.

As at 31 December 2018 these were:

Solvency capital requirement	Company - 2018 €	Company - 2017 €	Movement €
Market risks	1,054,598	938,180	116,418
Counterparty risks	790,359	807,230	(16,871)
Non-life underwriting risks	3,693,638	3,727,540	(33,902)
Basic SCR diversification	(662,513)	(820,668)	(58,188)
Operational risks	99,175	109,267	(10,092)
SOLVENCY CAPITAL REQUIREMENT	4,758,914	4,761,549	(2,632)

As at 31 December 2018 these were:

Solvency capital requirement	Group - 2018 €	Group - 2017 €	Movement €
Market risks	1,053,034	1,951,579	(1,013,399)
Counterparty risks	312,516	528,145	279,085
Non-life underwriting risks	3,541,449	1,909,204	1,818,336
Basic SCR diversification	(662,512)	(1,054,362)	233,694
Operational risks	124,368	52,951	56,316
SOLVENCY CAPITAL REQUIREMENT	4,368,855	3,387,517	1,374,032

2.3. Neither the Company nor the Group have utilised simplified calculations in applying the standard model and there has been no use of undertaking specific parameters in the non-life underwriting risk calculations.

2.4. The inputs used to calculate the MCR of the Company are as follows:

Line of business	Net (of reinsurance) best estimate and technical provisions calculated as a whole (£'000) 2018	Net (of reinsurance) best estimate and technical provisions calculated as a whole (£'000) 2017	Net (of reinsurance) best estimate and technical provisions calculated as a whole (£'000) Movement
Other motor insurance	1,650,282	1,877,182	(226,900)
Marine, aviation and transport insurance	0	1,738,213	1,738,213
Fire and other damage to property insurance	0	1,432,759	1,432,759

Line of business	Net (of reinsurance) written premiums in the last 12 months (£'000) 2018	Net (of reinsurance) written premiums in the last 12 months (£'000) 2017	Net (of reinsurance) written premiums in the last 12 months (£'000) Movement
Other motor insurance	-	-	-
Marine, aviation and transport insurance	550,719	495,866	54,853
Fire and other damage to property insurance	1,118,126	991,732	126,394

3. Non-Compliance with the MCR and Non-Compliance with the SCR

3.1. The Company and Group have maintained capital sufficient to meet their minimum capital requirements throughout the period covered by this report.

4. Any Other Information

The Directors do not consider that there is any further information which should be disclosed regarding the capital management of the Company or the Group.
